PROFESSIONAL SUMMARY

Third-year B.Tech Information Technology student with hands-on experience in Python, AI/ML, web development, and cybersecurity through technical internships and practical projects. Built AI-based image restoration and web applications using Python, PyTorch, Flask, React, and JavaScript, with practical exposure to AI-agent workflows, APIs, Git/GitHub, and real-world problem solving.

EDUCATION

B.Tech – Information Technology, DMI College of Engineering, Chennai

Expected Graduation: 2028

TECHNICAL SKILLS

Programming: Python, C, Java

Web: HTML, CSS, JavaScript, React, Flask

AI/ML & Data: Artificial Intelligence, Machine Learning, Data Science, PyTorch

Tools: Git, GitHub, VS Code, Google Colab, Google AI Studio, Antigravity

Other: REST APIs, Problem Solving

PROJECTS

AI Image Restoration System

Python, PyTorch, UNet, Flask

- Developed an AI-based image restoration system to reconstruct cleaner images from noisy inputs using a UNet architecture.
- Trained the model on 3,200 paired noisy and ground-truth image samples with GPU acceleration.
- Built a Flask web interface for image processing and side-by-side visualization of noisy and restored outputs.

InternShield – Fake Internship Detection Web App

Python, Flask, Web Technologies

- Developed a web application designed to identify potentially fraudulent internship opportunities.
- Implemented a user-focused interface for submitting and evaluating internship information.

SheSkills – Women Skill Exchange Platform

Web Technologies

- Developed a web-based platform for women to share, exchange, and discover skills.
- Focused on accessible user interaction and collaborative skill development.

Safe Exam Environment

Web Technologies

- Developed a solution focused on creating a secure and controlled environment for online examinations.
- Designed the application around examination security and reducing opportunities for malpractice.

INTERNSHIP EXPERIENCE

AI Agent Intern — LICERON

Remote | August 2026

- Developed AI-agent workflows involving tool-based and multi-step task execution using Python.
- Integrated search, calculator, planning, and final-response synthesis components.
- Gained practical experience with APIs, AI tools, Git/GitHub, and agent-based application development.

AI Intern — SOFTRATE TECH PARK

Onsite | July 2026

- Completed a 15-day AI internship involving practical exposure to AI concepts and project-based activities.
- Applied technical knowledge through hands-on activities and AI-based problem-solving approaches.
- Gained practical exposure to applying AI concepts in project-based scenarios and understanding their use in real-world problem solving.

Student Intern — KIML

Onsite | July 2026

- Completed a one-month student internship with practical exposure to a professional working environment.
- Participated in assigned activities while developing workplace, teamwork, and professional skills.

Intern — Schneider Electric Private Limited*Onsite | March–April 2026*

- Gained practical exposure to industrial operations and workplace processes.
- Worked in the packing department while following operational procedures, accuracy requirements, and workplace practices.

Cybersecurity Intern — Hanii Software Technology*Remote | July–August 2025*

- Completed a one-month internship focused on cybersecurity concepts and practices.
- Participated in assigned cybersecurity-related activities and developed foundational industry knowledge.

CERTIFICATIONS / TRAINING

MongoDB Certificate | Karma AICTE Certificate | Green AI Sustainability Certificate | React To-Do App Certificate

LEADERSHIP / EXTRACURRICULAR ACTIVITIES

- Coordinated WebAura technical event through the AppExpert Club.
- Contributed as an organizer for PredictFest 2K26 conducted by the DMI Data Science Club.
- Participated in a 48-hour online hackathon focused on website redesign and development.
